

Course	Skills	Strongest	Weakest	Github Examples of work
Data Analytics Course 1 -- CIDM6312* SEM INFO/VISUAL	- Information Visualization - Design - Color Theory	- UI Layout - Design best practices/standards - Visual Narrative/Consistency	- Large datasets - Too much flair whilst designing - Mobile Screen Layouts	No GitHub for this, so I included one of my work dashboards (used for monitoring inventory/delivery flows in a warehouses): 
Data Analytics Course 2 -- CIDM*5310 BUS INTEL & DS SYS	- Tableau - MS PowerBI - Fact-based analytics - Data Storytelling	- BI Dashboards - KPI metrics - Interpretation of visuals	- DAX Scripting - Tableau UI - Complex math logic	No GitHub for this, so I included one of my work dashboards and a link to the data camp course I took at the time: https://www.datacamp.com/completed/statement-of-accomplishment/course/d631758510358140f79927b3f5c3948b08c5a858 

Data Mining and Management Course 1 -- CIDM*6350 DATA & INFO MGT	• SQL • Databases • ETL	• SQL Joins • Queries • Schema Mapping	• Slow Queries • Data rules/integrity/consistency • Messy initial data	No GitHub but here is a query from then: -- Task 1 <pre>INSERT INTO Employees (LastName, FirstName, BirthDate) VALUES ("Avaya", "Bates", "1987-01-01"), ("Don", "Bains", "1969-12-05"), ("Mehreen", "Strong", "1994-03-06"), ("Kayson", "Bravo", "2000-01-07");</pre> -- Task 2 <pre>Update Employees Set BirthDate = "1968-01-30" Where EmployeeID = 1;</pre> -- Task 3 <pre>INSERT INTO Employees (FirstName, LastName, Notes) VALUES ("Cooper", "Ramirez", "Has MBA and fluent in Spanish"), ("Anna-Marie", "Prosser", "Graduated West Texas A&M");</pre> -- Task 4 <pre>Update Customers Set Country = "United States of America" Where Country = "USA";</pre> -- Task 5 <pre>Delete From Products Where SupplierID = 3; Delete From Suppliers Where SupplierID = 3;</pre>
Data Mining and Management Course 2 -- CIDM*6355 DATA MINING METHODS	• Rapid Miner • R/RStudio • Clustering	• Pattern Recognition • Predictions • Data Pre-processing (handling outliers/missing data)	• Programming in R/RStudio • Algorithm fine tuning • Formula selection	No GitHub from this course but snippet of code below: <pre>Lab8Data<-read.csv("C:\\Users\\a13152\\OneDrive - Cleveland-Cliffs Inc\\Desktop\\R\\City_Data.csv",header=T) head(Lab8Data) summary(Lab8Data) str(Lab8Data) cor(Lab8Data[,c(2:6)]) CityCluster<-kmeans(Lab8Data[,2:6], 3, nstar = 100) CityCluster table(CityCluster\$cluster, Lab8Data\$Metropolitan_Area) data.frame(CityCluster\$size, CityCluster\$center) CityRecords<-data.frame(CityCluster\$cluster, Lab8Data[c(1:6)]) head(CityRecords)</pre>

				write.csv(CityRecords, file = "CityRecords.csv")
Systems Development Course 1 -- CIDM*6303 TECH FOUNDATIONS CIS	• Python • Code Testing • Time Series Data • Pandas	• Debugging • Functions • Pandas/Data Cleaning	• Unit testing • Advanced Logic • Regular Expressions	https://www.datacamp.com/completed/statement-of-accomplishment/track/34e4c5a2a2c9a842c2f9c540f4c009235193fd6
Systems Development Course 2 -- CIDM*6325 WEB APP DEV	• MS Visual Studio Code • MS Copilot/Generative AI • Django • SDLC	• UX Testing • Documentation • Prompt Programming • Full stack development	• Git • Organization • Managing Project Deliverables	https://github.com/alelawsoWTAMU/CIDM_6325_Homestead_Compass_Lawson.git
Networking and Cybersecurity Course 1 -- CIDM*6340 NTWK MGT & INFO SEC	• Wireshark • Network Device Mapping • Shields Up	• Device/Risk Management • Keeping systems functional • Monitoring resource usage	• Calculating Network Sizes • Reading Digital Envelopes • Interpreting Error Logs	No GitHub for this course but below is the scan of all the IPs in my home from that time period: • 10.0.0.1 Router • 10.0.0.67 Laptop Computer • 10.0.0.27 Samsung Smart Tv • 10.0.0.71 Firestick 2 • 10.0.0.196 Firestick 1 • 10.0.0.140 Nintendo Switch • 10.0.0.61 Girlfriend's iPhone • 10.0.0.164 TBD • 10.0.0.18, Business Phone • 10.0.0.178, Personal iPhone • 10.0.0.14, Personal PC • 10.0.0.136, Xbox • 10.0.0.79, Roku TV • 10.0.0.4, Ford Escape • 10.0.0.81 Ring • 10.0.0.248 Apple Watch
Networking and Cybersecurity Course 2	• Google Colab • Fraud Detection	• Evidence Auditing • Documentation • Steganography	• Advanced Algorithms • Legal Standard Compliance	https://github.com/wtamucis/fraud-detection-website-alelawsoWTAMU

-- CIDM*6356 DIGITAL FORENSICS	• Chain of Custody		• Wrangling extremely large/more complex datasets	https://colab.research.google.com/drive/1LbHiM6zklOAuDK-8KGezcRUfl6tumZgt?usp=sharing
